BROCHURE DETAILS REVOLUTIONARY NEW 100% COMPOSITE-MATERIAL RECESSED CFL DOWNLIGHTS FROM NUTECH

New York, NY, 2006 — NuTech Lighting Corporation, the innovative manufacturer of high-performance, ENERGY STAR listed, compact fluorescent downlighting, has announced availability of a full-color brochure detailing this startlingly new patented product line.

The 4-page brochure shows in actual product photographs, cutaways and renderings why this new type of downlight makes traditional welded and bolted steel and aluminum downlights obsolete. The brochure indicates how this surprisingly low-profile, more unitized downlight fits all lighting requirements of its kind, straight down, angled or wall washing. All ceiling conditions, whether low plenum, insulated or fire rated. Sheetrock, wet plaster or acoustical grid ceilings. Any commercial, institutional or residential application, including Title 24 requirements.

100% composite construction contributes to increased lamp and ballast life; is corrosion resistant; nonconductive, nonhostile to workers during installation, lamp or trim changes; self-extinguishing and lightweight. Units are UL, CUL and UL Marine listed, covering dry, damp or wet locations.

Copies of the recessed CFL downlights brochure are available by contacting NuTech Lighting Corp., 608 Fifth Avenue, Suite 303, New York, New York 10020. Telephone: (212) 541-7397. Fax: (212) 459-0880. E-mail: information@nutechlighting.com. Learn more about NuTech Lighting at: www.nutechlighting.com.
